HUMAN RIGHTS RESEARCH

RESEARCH ON “INSTITUTIONAL MECHANISMS FOR THE PROTECTION OF HUMAN RIGHTS AND FUNDAMENTAL RIGHTS IN SRI LANKA: A STUDY ON EFFECTIVE IMPLEMENTATION GAP”

The main objective of the community research is to understand the gap between the institutional rights mechanisms and the practical implementation of human rights and fundamental rights in Sri Lanka. This will further support to identify potential ways of strengthening the access to justice of grassroots communities and make policy recommendations. This community research can increase attention to the complex issues of the knowledge gap that compromise the rights of people living in marginalized communities. Because such research requires grassroots work in the community, it enables the CSHR and FRIENDS to fully understand the unique local realities that may either impede or facilitate community interventions. In fact, recognition of the inequities in human rights knowledge among identified communities and how they are associated with poverty, inadequate resources, lack of employment opportunities, gender, social hierarchies among many more other factors may lead to a renewed recognition that individuals are embedded within social, political, and economic systems that shape behaviours and access to justice.

Data collection was carried out by the research team at Chavakachcheri and Karainagar on September and at Mahiyanganaya, Bibila and Puttlam in December.

This project is organized under the auspices of the Forum for Rural Income & Environmental Development Services (FRIENDS) Guaranteed Limited.

The main objective of the initiative of five Community Centres across the country, is to revive the concept of 'Community Centres', in order to address the human rights and legal issues at grass root level.
